To Whom It May Concern:

Walking into Deb's Vineyard Homes model in the 2017 Parade of Homes, we knew this was the house we wanted to build and the builder who could make it happen.

Although the model was larger than we needed, Deb helped us scale it down to 2,000 square feet. Her contemporary southwest design was used as the basis for our plan, and with her guidance, we made the floor plan our own. It offers an open feel and separate wings for the bedroom areas. The large windows capture views of the mountains, mesas, and arroyo.

Deb was easy to work with and along the way, offered design suggestions that made our home special. In fact, it won two awards during the 2018 Parade of Homes: the premier award and an award for best kitchen! She was open to infusing our coastal colors and contemporary light fixtures into the design.

Deb employs subcontractors who take pride in their work and use creativity to enhance the interior design. We found them accessible and professional.

We had a difficult building lot to work with, but Deb worked with us to secure the steep slope and to build a courtyard that provides us privacy and seclusion.

We are thrilled to be in our lovely, contemporary home and are grateful for the opportunity to have worked through the process with Deb's guidance.
